Japan	11	23	5	53	20	14	12	14	9	31

Example on how to improve in AI in countries?

Education

- Education (undergraudate? High school?),
    - **AI literacy , in hand experience..?** -> (ex. # of experts in AI in the country? -> resource management w.r.t. AI field)
- Exchange programs? With other countries and collaborating (i.e. collaboration with MIT, stanford, etc. universities that are doing ground-breaking research in AI.)
    - **AI summit** in Inda to collaborate with AI big giants. (ex)
    -
- capital (data) -> publicized database ,
- Good quality data for training..?
- Investment on the infrastructure of datacenters?

Environmental

- Making sure with energy / environmental impacts on -> can the infrastructure support such system. -> GPU usage? Constraints?

Infrastructure

- semi-conductors ? replicate what they have?

- Implementation strategies for KPIs
    -

Main aspects:

1. Research in AI - we are generating best algo, technical , math ,etc
2. Data, infrastructure, environmental
3. Population is being able to use the system (**sustainable and practical manner**)
    a. Education, AI literacy, AI summit, what AI can do?

Exploring more factors -> ?

By monday night , we do small research and find ?

1. Collect in one place
2. Understand the resources

1. To achieve this, your team will first need to collect public data from news sources, social media, reports, blogs, and interviews with experts on the development of AI ecosystems in various countries and their corresponding AI strategies.

!Action item for 5pm Monday!

Understand the data!!!! Get through the blue links first and understand.
Try to extract KPIs
